Pomegranate Educational Seminar
Arizona Rare Fruit Growers

Thursday , March 11, 2010 7:00PM University of Arizona Cooperative Extension Office, 4341 E. Broadway, Phoenix, Arizona

Please join us for an exciting evening and discussion on the USDA Pomegranate collection and Pomegranate cultivation!

Our Keynote speaker, Mr. Jeff Moersfelder, USDA Greenhouse Propagation Manager and Curator of our Nations' Pomegranate Collection, will discuss characteristics of the 600 pomegranate varieties held by the USDA in Davis, California, and the mission of the USDA in preserving these varieties. We are also excited to welcome Mr. Harvey Correia, Pomegranate farmer and founder of the exciting Yahoo group Pomworldwide.

This is an opportunity to meet leading figures in the study of Pomegranate culture, and ask questions about the cultivation of these fruit. As usual, bring your fruit from the garden to share afterwards.

For additional information contact AzCRFG President Monte Palmer at Palmermj1@juno.com , or Patrick Hallman, Program Chair P_hallman05@hotmail.com .
